

Cybersecurity Officer

Vivino is looking for a Security Officer to lead our cybersecurity efforts, further including defining and implementing security policies that align with our company values of community, trust, and responsibility.

Responsible for internal/external cybersecurity together with security and privacy compliance

As Security Officer, you will have overall responsibility for cybersecurity, internally and externally, and security and potentially privacy compliance. In doing so, you will work together with the CTO, DevOps, internal IT, and other stakeholders to define and implement security policies that align with our company values. Thus, you will be working out of our Copenhagen office and reporting to the CTO.

In addition to the above, your key responsibilities will include to:

- Conduct risk assessments and define security and privacy policies across the organization
- Coordinate with Engineering on security implementations and tools
- Oversee security incident response planning and investigation of breaches
- Schedule and help conduct periodic cyber and data security audits
- Work with outside consultants as appropriate for independent security audits
- Review infrastructure and IT security and identify areas for improvement
- Help develop and educate employees on our security policies, procedures and standards
- Advice management on cybersecurity issues, policies and practices

You are a curious, passionate, and communicative person with a strong analytical mindset

In this role, we are looking for someone who is genuinely passionate about cybersecurity and stays updated within the field. In addition, you know how to treat security as a cost/benefit tradeoff (for various definitions of costs and benefits), and take security seriously while having a pragmatic view of it rather than blindly following frameworks, standards or procedures.

Furthermore, we hope to see that you have and can demonstrate:

- BS level education or higher
- 5+ years of relevant experience from a similar role, with broad knowledge of technology and cybersecurity
- Knowledge and experience with privacy and security compliance
- Knowledge of different security frameworks (NIST, CSF, ISO27001)
- Strong grasp of cryptography and public authentication protocols (OAuth 2.0 etc)
- Experience with penetration testing and ethical hacking
- Ability to read, write, and speak English fluently
- Strong communication skills and an eagerness to learn
- You are not an asshole

ABOUT VIVINO

Who are we?

TRUSTED BY MILLIONS TO DISCOVER AND BUY THE RIGHT WINE EVERY TIME
Vivino is the world's largest online wine marketplace and most downloaded wine app, powered by a community of millions. Vivino's unique wine shopping experience leverages community data to suggest personalized wine recommendations for each individual user. In addition to making wine discovery fun and effortless, Vivino is the best place for wine drinkers to buy wine. The Vivino app is available for download on Android and Apple devices.

We are a fast-paced, growing team with offices in San Francisco, California, and Copenhagen, Denmark. We also have teams worldwide in the UK, Netherlands, Italy, Spain, Germany, France, Ireland, Australia, Shanghai, and Hong Kong.

Our team is passionate about our core purpose - to empower people everywhere to enjoy wine to the fullest. We do that every day by building technology and leveraging data that puts the power back in the hands of the consumer. We do not see wine as a commodity but as an offering of a cultural experience that was once out of reach for many but is now open to everyone.

Our five core values are:

- Always Strive for Better
- Work Together
- Earn and Offer Trust
- Be Approachable
- Lead with Data

Commitment to diversity and inclusion
